INTRODUCTION

HOW IT WORKS

APPLICATION DASHBOARDS

Cat Construction Technology Portfolio

Making the jobsite more productive, efficient and safe

CAT GRADE
Automate grading, boost precision, speed and efficiency

CAT COMPACT
Meet compaction targets faster, more uniformly and in fewer passes

CAT PAYLOAD
Help reduce load times, optimize loading efficiency and increase jobsite productivity

CAT DETECT
Expanded view of the working environment around equipment keeps people and assets safe

CAT COMMAND
Remote control offering improves operator safety, equipment availability and site productivity

VISIONLINK
Tracking individual asset performance and needs to increase uptime and lower costs

VISIONLINK PRODUCTIVITY
Gather real-time data to track equipment use and health across your fleet

VISIONLINK[®] TECHNOLOGY

TURN DATA INTO ACTIONABLE INSIGHTS

CAT[®] EQUIPMENT MANAGEMENT
VISIONLINK[®]

Are you ready to take the guesswork out of fleet management? VisionLink[®] delivers easy-to-understand actionable insights to help you make informed decisions at every turn. Get the most out of your entire fleet - from one single, intuitive, and trusted application.

COMPLETE VISIBILITY TO MANAGE YOUR ENTIRE FLEET

VisionLink[®] is a cloud-based software application:

- That takes the guesswork out of fleet management with key insights to maximize performance regardless of fleet size or equipment manufacturer.
- Receive equipment data seamlessly to your desktop or mobile device.
- All from a convenient centralized solution allowing you to make informed decisions.

MORE THAN **ONE MILLION+** CONNECTED ASSETS GLOBALLY

CONSTRUCTION INDUSTRIES

Building Construction Products | China Operations | Earthmoving | Excavation | Global Construction & Infrastructure | SEM | Services | Supply Management

CATERPILLAR[®]

BETTER DATA, BETTER DECISIONS
ELIMINATE GUESSWORK

MONITOR ENTIRE FLEET

Get actionable telematics data and manage mixed OEM fleets via one interface. Track location, operating hours, fuel levels, and overall utilization.

MAXIMIZE UPTIME

Monitor equipment health, fault codes, fluid analysis, and inspection due dates. Reduce unplanned downtime with critical alerts. Order parts and schedule service within the platform.

OPTIMIZE UTILIZATION

Manage assets by projects, groups, or geofences. Set utilization targets and monitor performance. Make informed, data-based decisions to reduce operating costs.

ACTIONABLE INSIGHTS AT-A-GLANCE

CONSTRUCTION INDUSTRIES

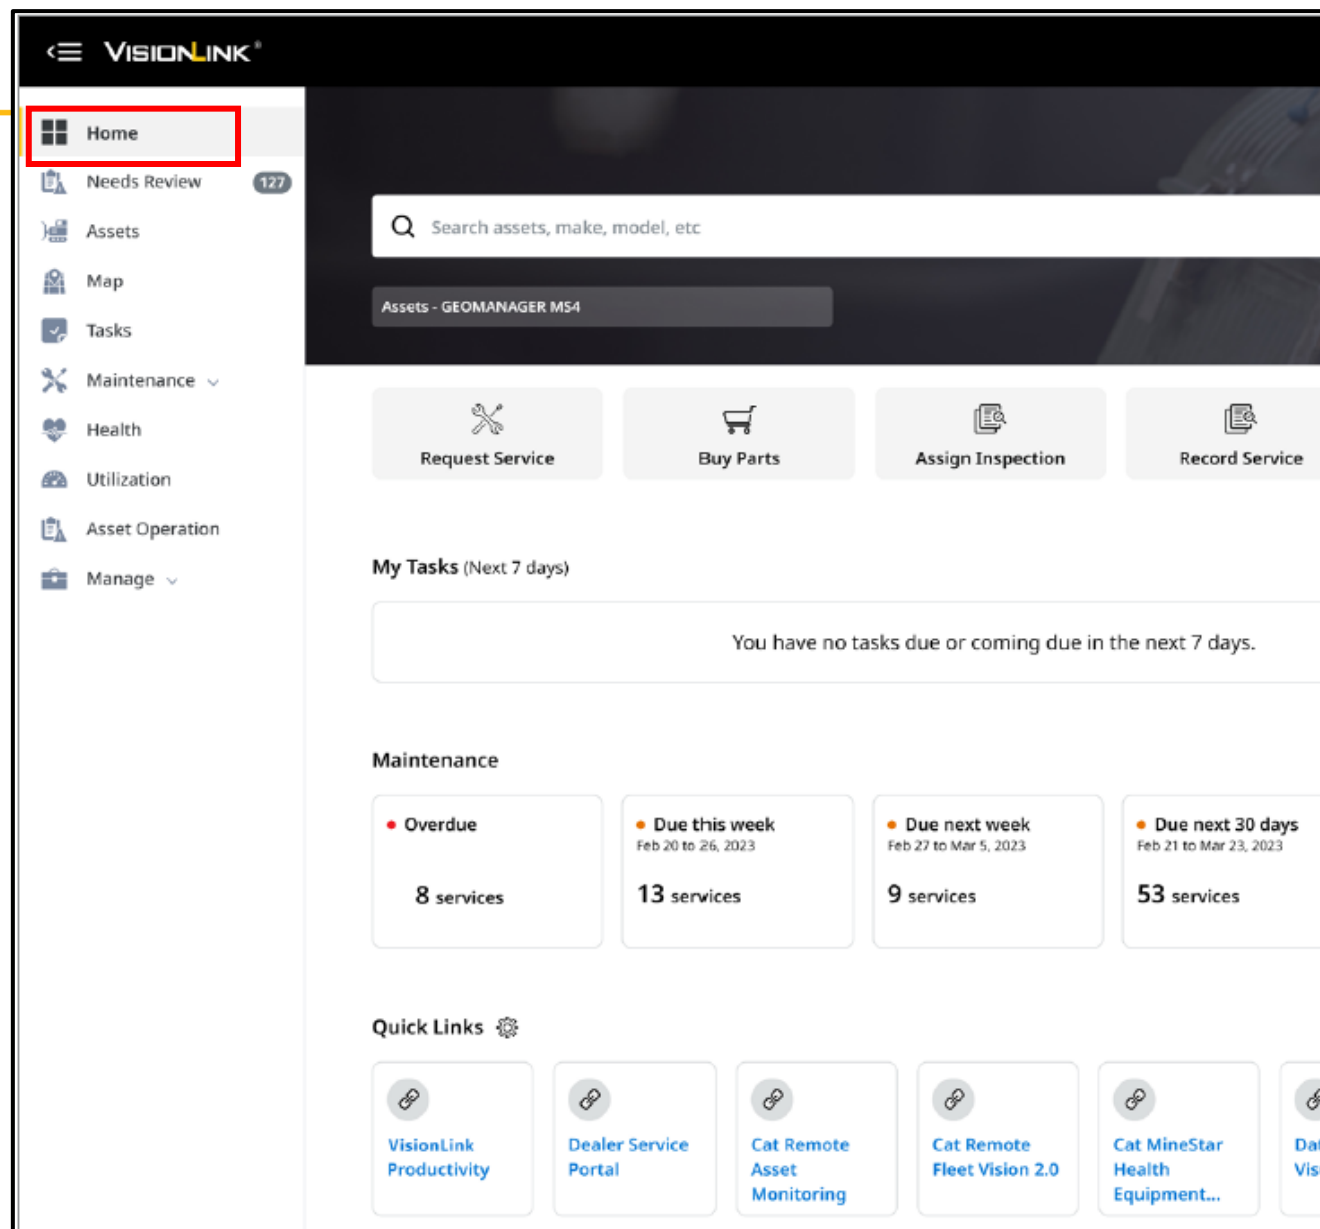

Building Construction Products | China Operations | Earthmoving | Excavation | Global Construction & Infrastructure | SEM | Services | Supply Management

The Home dashboard is the VisionLink default landing page. It provides:

- **A global search** bar that lets you search for product families and groups in addition to assets, makes, and models.
- Easily access features such as requesting service, purchasing parts, assigning inspections, recording services, and jobsites.
- **My Tasks** shows tasks due within the next seven days, along with overdue tasks and tasks due today.
- **Maintenance review** gives quick access to overdue and upcoming maintenance for your fleet.
- **Quick Links** provide access to other Cat applications.

NEEDS REVIEW DASHBOARD

The place in VisionLink where you can see assets that require attention on a daily basis enabling you to plan any maintenance activities proactively.

- Check out fault codes, fluid analysis, and inspections
- Add notes and history for each asset
- Assign tasks to complete pending issues
- Review detailed inspection reports for assets
- Order parts with direct integration with parts.cat.com
- Request service from your local Cat Dealer

ASSETS DASHBOARD

Provides in-depth information about individual asset status, hour meter, last known location, and more:

- Asset status
- Service meter
- Hour meter
- Last reporting location
- Next service
- Ownership status - owned, rental, leased or sold
- Fuel level percentage
- DEF level percentage
- Geofence locations
- And more (customizable)

The screenshot shows the VISIONLINK interface. On the left is a navigation menu with 'Assets' highlighted. The main area displays a table of assets with columns for 'Find assets', 'Last Known Asset Status', 'Last Known Service Meter', and 'Last Known Location'. A callout box highlights a specific asset, 'VLM01219 | CAT 390FL | Large Hydraulic Excavator', and opens a detailed view. This view includes a 'TIMELINE' showing a 'Maintenance Completed' event on 30/09/2021, a 'HEALTH' section with status indicators (RED, ORANGE, GREEN, BLUE), and a 'PLANNED MAINTENANCE' section showing 'NEXT SERVICE DUE' for 'PM 2 PERFORM (500 HOURS INTERVAL)' due in 271 days at 4,977 hours.

TASKS DASHBOARD

Task functionality enables people to be assigned to a project with a specific severity level and due date. Assigning tasks can enhance productivity and increase efficiency by monitoring an assignment from beginning to end, an essential part of managing your fleet. Centralized task management views all task details including:

- Asset information
- Task status
- Task assignee
- Task due date
- Task severity
- Task creation date
- Task creator
- Download task reports

The screenshot shows the VISIONLINK interface. On the left is a navigation menu with 'Tasks' highlighted in a red box. The main area displays a table of tasks under the 'Assigned to me' filter. The table has columns for 'Tasks', 'Assets', 'Task Status', 'Assignee', and 'Task Due Date'. One task, 'Planned Maintenance : PM 1 (250 HOUR INTERVAL)', is circled in yellow. A callout box provides details for this task, including its title, severity (Medium), due date (01/31/2023), assignee (Ramu Aitha), and a map of the last location (61528, IL, United States).

MAINTENANCE DASHBOARD

Overview of the maintenance needs for all assets managed within VisionLink:

- View maintenance summaries for all assets - fault codes, projected service meter, last reported location
- Order parts with direct integration with parts.cat.com
- Request service
- View existing service requests
- View a complete maintenance history for an asset
- Download summary reports

The screenshot displays the VisionLink Maintenance Dashboard. The left sidebar contains navigation options: Home, Needs Review (129), Assets, Map, Tasks, Maintenance (highlighted with a red box), Summary, Settings And Enrollment, Health, Utilization, Asset Operation, and Manage. The main content area shows a table of assets with columns for Asset, Totals (3 OVERDUE, 0 UPCOMING, 0 COMPLETED), Projected Service Meter (1,475 Hours), and Location (Hyogo Pref., Ono City, Sugetac...). A yellow circle highlights the asset VL601270 (CAT 390L), which is expanded into a detailed view. This view shows the asset's name (VL601270 | CAT 390L | Large Hydraulic Excavator), model year (2015), and total hours (5,477). It also displays a maintenance schedule with items like '3000 SERVICE HOUR MAINTENANCE' and 'PM 1500 (1500 HOUR INTER...)' with their respective due dates and overdueness status.

CONSTRUCTION INDUSTRIES

Building Construction Products | China Operations | Earthmoving | Excavation | Global Construction & Infrastructure | SEM | Services | Supply Management

HEALTH DASHBOARD

Fleet managers can use the Health dashboard to identify problems or opportunities when they happen. Catching and resolving issues as early as possible keeps the asset running and decreases the likelihood of additional problems.

The Health dashboard helps you to stay up-to-date on your machine health:

- Summary of fault codes, fluid analysis, and inspection results
- View information for previous days, date ranges or the current day
- Review service histories for assets
- Integrated with Cat S-O-SSM fluid analysis service and Cat Inspect App
- View fault code details from the Cat Service Information System
- Download health reports and inspection results

UTILIZATION DASHBOARD

Provides a high-level overview of idle time percentages, runtime hours, and other metrics related to machine performance. Data is visualized in chart and table formats to make identifying trends, outliers, and patterns easier to spot, making asset and fleet utilization optimizations easier:

- View fleet totals and individual assets
- Identify data trends
- Track fuel burn
- Estimate CO2 emissions*
- Detect high idle time
- Download or schedule email reports (CSV, XLSX, JSON, XML)
- And more (customizable)

CONSTRUCTION INDUSTRIES

Building Construction Products | China Operations | Earthmoving | Excavation | Global Construction & Infrastructure | SEM | Services | Supply Management

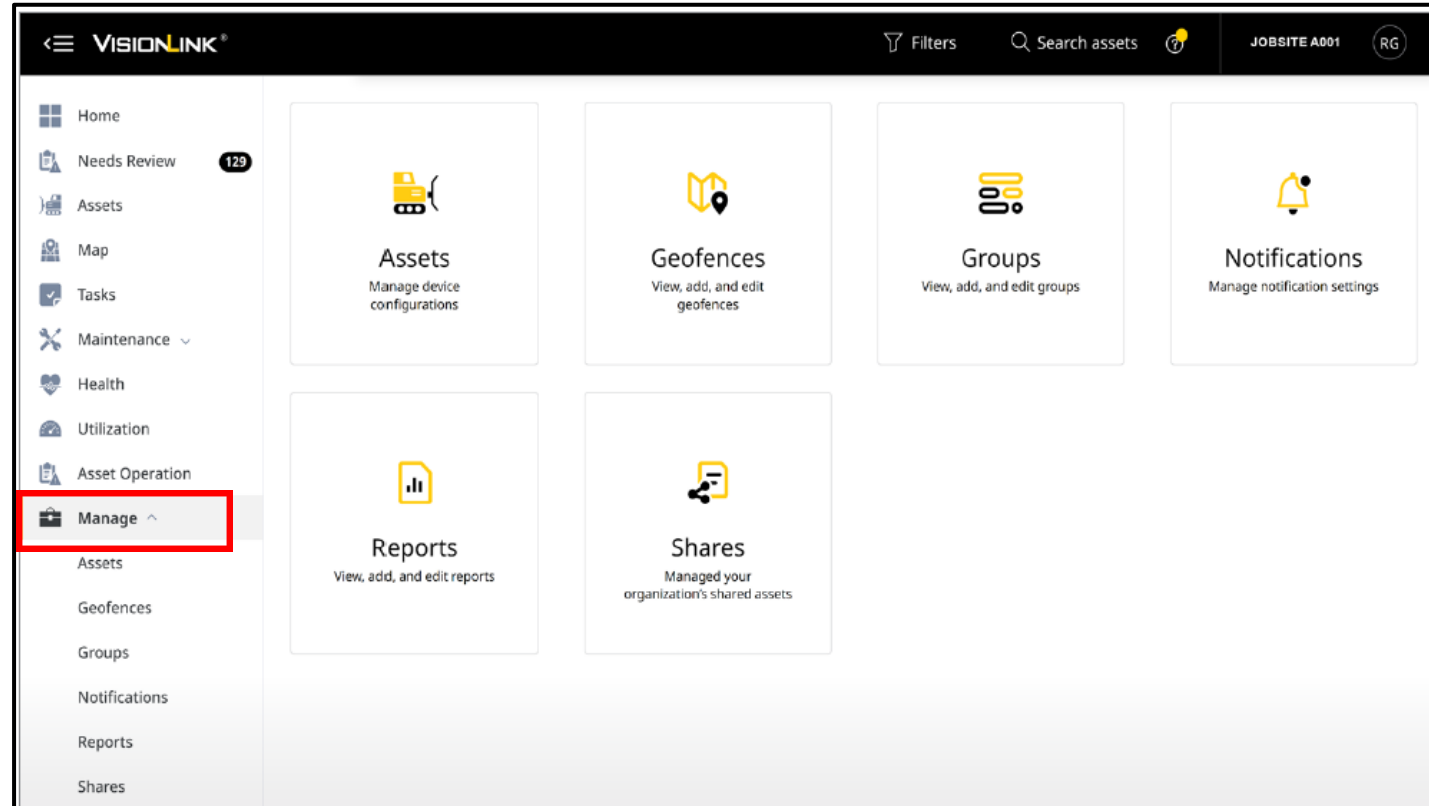

MANAGE DASHBOARD

VisionLink administrative tools are organized by categories within the Manage dashboard and can be modified based on a user's permission level. Category sub-pages include:

- **Assets** - Manage the hour meter and odometer settings of each asset and set the end-of-day reporting parameters.
- **Geofences**- Create custom map boundaries to track and report assets based on your business needs.
- **Groups**- Organize your fleet in ways that make sense to your organization.
- **Notifications** - Add, edit or remove notification alerts from a list of available system categories. Anything that meets your criteria will become a Needs Review item.
- **Reports** - Schedule reports based on fault code, fleet fuel, fleet usage, or fluid analysis.
- **Shares** - Configure and share temporary views of asset data with another organization while retaining ownership of the asset.
- **Users** - Manage who can access VisionLink and how they can use VisionLink data.

Customer Testimonial

"The VisionLink platform is a great asset for the business and for the fleet and helps us better manage the fleet to minimize downtime, maximize efficiencies and utilization, minimize our fuel burn, watch our idle hours. And so, it's a great tool to provide us the information we need to make decisions to more efficiently run our business."
